PROFESSIONAL SUMMARY

Insightful and technically proficient Data Analyst with 5 years of experience in transforming raw data into strategic business intelligence. Expert in developing automated data pipelines using Python and performing complex data manipulation with Pandas. Proven track record in managing large-scale relational databases via SQL and creating high-impact Data Visualization dashboards. Holds a Master's in Data Science.

CORE TECHNICAL SKILLS

- Programming & Libraries: Python (Advanced), Pandas (Expert), NumPy, Matplotlib, Seaborn, Scikit-learn.
- Database Management: SQL (PostgreSQL, MySQL, T-SQL), ETL Processes, Data Warehousing.
- Analytics & Visualization: Data Visualization (Tableau, Power BI), Exploratory Data Analysis (EDA), Statistical Modeling.
- Tools & Platforms: Jupyter Notebooks, Git, Excel (VBA/Macros), Google Analytics, AWS Redshift.
- Soft Skills: Analytical Thinking, Technical Reporting, Stakeholder Presentation, Problem Solving.

PROFESSIONAL EXPERIENCE

Data Analyst | Retail Metrics Group
January 2021 – Present

- Developed a suite of automated reporting tools using Python and Pandas, reducing manual data processing time by 60%.
- Architected and maintained complex SQL queries to extract insights from multi-terabyte datasets, supporting the executive decision-making process.
- Designed interactive Data Visualization dashboards in Tableau that tracked real-time sales performance across 200+ locations.
- Utilized Pandas for sophisticated time-series analysis to identify seasonal consumer trends, resulting in a 12% improvement in inventory turnover.

Junior Data Analyst | Insight Financial Corp
June 2018 – December 2020

- Cleaned and pre-processed large-scale financial datasets using Python scripts, ensuring 99.9% data accuracy for audit reports.
- Managed routine SQL database maintenance and optimized query performance for the internal research team.
- Produced weekly Data Visualization reports to communicate key performance indicators (KPIs) to department heads.
- Collaborated with data scientists to build predictive models, providing foundational support through rigorous Data Visualization of model outputs.

EDUCATION

Master's in Data Science
University of California, San Diego | 2016 – 2018
Specialization: Applied Analytics & Statistical Computing

Bachelor's in Mathematics
University of Washington | 2012 – 2016

KEY PROJECTS

- Market-Scraper AI: A custom Python application designed to scrape and analyze competitor pricing using Pandas for trend detection.
- SQL-Optimizer-Toolkit: A collection of optimized SQL templates for high-velocity transactional databases.
- Global-Health-Viz: An award-winning Data Visualization project mapping global healthcare outcomes using open-source datasets.

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Tableau Desktop Specialist
- SQL for Data Science (University of California, Davis)
