PROFESSIONAL SUMMARY

Solutions-oriented Senior DevOps Engineer with over 10 years of experience in automating, scaling, and monitoring mission-critical cloud infrastructure. Expert in container orchestration using Kubernetes and building high-performance CI/CD pipelines to accelerate software delivery. Proven track record of managing complex AWS environments and mastering Linux systems administration. Holds a Bachelor's in Computer Science.

CORE TECHNICAL SKILLS

- Orchestration & Containers: Kubernetes (EKS/GKE), Docker, Docker Compose, Helm.
- Cloud Platforms: AWS (EC2, S3, RDS, Lambda, IAM, VPC), Azure, GCP.
- Automation & CI/CD: CI/CD (Jenkins, GitLab CI, GitHub Actions), Terraform, Ansible.
- Operating Systems: Linux (Ubuntu, CentOS, RedHat), Bash Scripting, Python.
- Monitoring & Logging: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana).

PROFESSIONAL EXPERIENCE

Senior DevOps Architect | CloudStream Technologies
January 2019 – Present

- Led the migration of legacy on-premise applications to a microservices architecture using Kubernetes and Docker, improving system scalability by 200%.
- Designed and maintained global infrastructure on AWS, ensuring 99.99% availability for high-traffic enterprise applications.
- Architected robust CI/CD workflows that reduced deployment cycle times from days to minutes, significantly increasing developer productivity.
- Optimized Linux server performance and security hardening, reducing infrastructure vulnerabilities by 40% across the organization.

DevOps Engineer | SysOps Solutions Group
June 2014 – December 2018

- Managed containerized environments using Docker, facilitating seamless transitions between development, staging, and production.
- Automated infrastructure provisioning on AWS using Terraform, eliminating manual configuration errors.
- Maintained and scaled automated CI/CD pipelines for 20+ independent software teams.
- Provided expert-level Linux support, troubleshooting complex networking and kernel-level issues in high-pressure production environments.

EDUCATION

Bachelor's in Computer Science
University of Washington | 2010 – 2014

KEY PROJECTS

- Kube-Guard: An open-source security monitoring tool for Kubernetes clusters, focusing on real-time threat detection.
- Auto-AWS-Deploy: A custom Python framework designed to automate resource cleanup and cost optimization on AWS.
- Linux-Distro-Lite: A customized, lightweight Linux distribution built for specific high-performance computing tasks.

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate
- Red Hat Certified System Administrator (RHCSA)
